

Culturally Responsive Teaching and the Brain

Promoting Authentic Engagement and Rigor Among Culturally and Linguistically Diverse Students

READ MORE

LIBERATORY THINKING TEACHING AND LEARNING WEBSITE

The achievement gap remains a stubborn problem for educators of culturally and linguistically diverse students. With the introduction of the rigorous Common Core State Standards, diverse classrooms need a proven framework for optimizing student engagement and facilitating deeper learning.

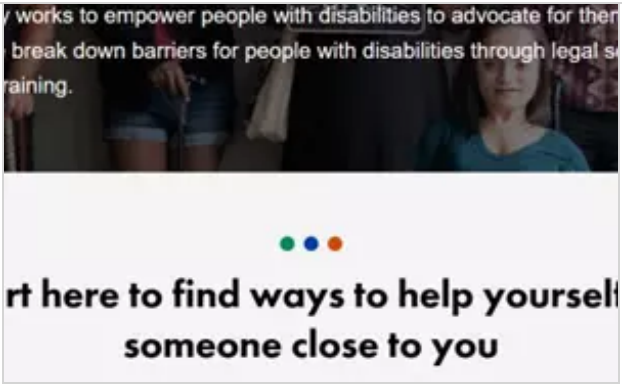

Culturally responsive pedagogy has shown great promise in meeting this need, but many educators still struggle with its implementation. In this book, Zaretta Hammond draws on cutting-edge neuroscience research to offer an innovative approach for designing and implementing brain-compatible culturally responsive instruction.
