

AFTERSCHOOL PROGRAM

*Afterschool
Expanded Learning*

ENGLISH SPANISH

As a nonprofit organization, Think Together provides students with academic support such as homework tutoring and lessons that align with their curriculum to help them excel in school. But we also support your student in many other ways, including physical activity, social and emotional support, and enrichment lessons to help them discover new and exciting subjects to expand their knowledge and interests.

Think Together's Afterschool Expanded Learning Programs provide meaningful academic and enrichment activities for TK-12 grade students. Afterschool programs keep kids safe, provide them with homework support and dynamic learning time, while helping working families. Parents have seen improvements in their children's behavior, school attendance, and school performance when they participate in afterschool programs. Expanded Learning Programs are one way Think Together is partnering with schools and communities to close the achievement gap.

Think Together supports working families with **afterschool** programs and also has opportunities for middle school students to attend **before school**.
